# ABOUT

## BLDC TECHNOLOGY

BLDC stands for Brushless Direct Current. BLDC motor has no mechanical brush for commutation of the windings. Commutation is deployed with the help of smart electronics. The input voltage provided is 230V AC which is converted to 24V DC by a SMPS. The fan runs internally at 24V and consumes just 28W at full speed.

## ADVANTAGE

- Consistent performance even at low voltage and power fluctuation.
- Multiple speed control gives flexibility.
- No humming noise even at low speed.

## POWER

## CONSUMPTION DIFFERENT SPEED

The power consumption\* of the Nestla Fan varies with the speed at which it is set.

	WATTAGE (W)	RPM
SPEED 1	3	105
SPEED 2	7	185
SPEED 3	10	230
SPEED 4	17	290
SPEED 5	28	355
TURBO SPEED	34	380

USAGE 16 HOURS/DAY, FOR 300 DAYS A YEAR WITH ELECTRICITY RATE OF 7/UNIT

The above specifications may vary for different models
